EDUCATION

2023-2027

ERHVERVSAKADEMI SYDVEST

- AP Degree in Multimedia Design
- PBA in Web Development

TECH SKILLS

- Frontend: Vue, React/Next.js, TypeScript, Tailwind, HTML/CSS
- Backend: Node.js, Express, NestJS, PHP, Python
- DB: MongoDB, SQL
- Tools: Git, Jira, Figma/Adobe XD

SOFT SKILLS

- Problem-solving
- Analytical thinking
- Communication
- Creativity
- Team Work
- Documentation
- Detail Oriented

ABOUT ME

Full-stack developer with production experience in Vue/React, TypeScript, Node.js, and MongoDB. I build and ship end-to-end features (UI → API → database) with a focus on performance and clean architecture.

Seeking a full-time full-stack role where I can take ownership and deliver fast.

WORK EXPERIENCE

Visma Creditro

Dec 2024 - Jan 2026

Full-stack Developer

- Migrated caching from in-memory to Redis across microservices, achieving ~2.2× speedup for cached workflows (internal benchmarks).
- Implemented an OCR-based document extraction feature for client-uploaded documents to automate reading/processing.
- Built internal metrics/statistics tools to support monitoring and reporting across the platform.
- Developed multiple PDF templates/pages using a PDF builder for different business workflows (e.g., severity reporting).
- Delivered platform localization (SV/NO/FI) using the internal translation system; implemented translation solution + translation key caching. Worked in Scrum.

HOLDBOX

Jan 2025 - Mar 2025

Full-stack engineer - internship

- Built and shipped a production e-commerce web app and an internal admin dashboard end-to-end supporting 1000+ products (Next.js/React, Node.js, MongoDB).
- Implemented core commerce functionality: product catalog, product details, cart, checkout flow, and order management.
- Developed an admin dashboard to manage products, orders, and content; created reusable UI components with Tailwind CSS to keep the UI consistent and scalable.
- Designed and maintained API routes and server-side logic (validation, error handling, auth/roles as needed), ensuring reliable data flow between frontend and database.
- Fixed production bugs and iterated on conversion-critical user journeys based on real usage and stakeholder feedback.
- Worked in Git-based workflows and iterative delivery, shipping incremental updates quickly and safely.

LANGUAGES

Office 365 - Microsoft

Apr 2023 - Sep 2023

Tech support Engineer

- Provided professional and competent support to customers, ensuring a high level of service.
- Used advanced troubleshooting techniques, including scripting in CMD or PowerShell, to resolve customer issues.
- Diagnosed and resolved complex issues related to email configuration, Exchange Online, Azure, licensing and commerce. Helped companies like IBM, CERN, Cisco.
- Collaborated with senior engineers and escalation teams to identify recurring issues and implement long-term fixes via scripting or renewing licenses.

Cisco

Nov 2022 - Apr 2023

Technical Support Advisor

- Resolved customer issues across multiple platforms through phone, email, and chat.
- Guided users through troubleshooting steps for network connectivity, hardware setup, and account-related issues.
- Strengthened communication, problem-solving, and documentation skills Logged, tracked, and updated support tickets in internal CRM systems, maintaining detailed case documentation to send the cases over to the networking team.
